Summary

Hello! I am Ali Haydar. I graduated from Karabük University in computer engineering and I am passionate about software development. I have been working with the Flutter framework for more than 2 years and I am constantly improving myself in this field. Additionally, I have 1 year of work experience with Unity Engine and took part in mobile game development processes.

The complex application I developed with Flutter and the mobile games I published with Unity gave me the opportunity to showcase my talents and creativity in the software world. These experiences encouraged me to further my technical skills and develop further in new projects.

I am currently improving myself further in Flutter and looking for new job opportunities in this field. I look forward to contributing and developing unique applications as part of an innovative team.

I am someone who likes to take responsibility, is prone to teamwork and is willing to constantly learn. I look forward to collaborating on new projects and achieving great success together. Feel free to contact me!

Education

Karabuk University **08.2015-06.2020**
Computer Science Bachelor's Degree
3.1/4.0
🔗 <https://karabuk.edu.tr/>
I have successfully graduated as computer engineer from this university.

Experience

Freelance **04.2024 - Present**
Software Developer (Flutter) Remote
Have published 50+ apps on mobile platforms

Atlas Game Studios **03.2023 - 03.2024**
Game Developer Remote, Türkiye
•Debugged programs and solved complex technical problems within game production.
•Collaborated with design team to help define technical design of new game features.
•Employed special engineering tools in software design, development and testing.
•Quality tested coding to identify and resolve problems or bugs
•Contributed to game project life cycle from prototyping and development to live-ops.
•Developed new features and gameplay systems in C# and Unity.

Turkish Naval Forces **04.2021- 04.2022**
Engineer Officer Kocaeli,Türkiye
🔗 <https://www.dzkk.tsk.tr/en-US>
I completed my 1-year compulsory military service in the Turkish Navy.

Atlas Yazılım ve Bilişim **07.2019-08.2019**
Android Developer(Kotlin) Istanbul,Türkiye
🔗 <https://www.atlasyazilim.com.tr/en>
I did my another 1-month compulsory internship in this company as an Android developer.

Atlas Yazılım ve Bilişim **07.2018-08.2018**
Android Developer(Java) Istanbul,Türkiye
🔗 <https://www.atlasyazilim.com.tr/en>
I did my 1-month compulsory internship in this company as an Android developer.

Projects

ChatBlue **2025**
Flutter App
A Bluetooth Classic-based, fully offline peer-to-peer chat application. It aims to facilitate short-range, device-to-device communication, particularly in disaster scenarios like earthquakes, where the internet and local networks are unavailable.

FreeAi Hub **2025**
Flutter App
It is an open source project developed with Flutter, which aims to bring together free artificial intelligence tools with users and allow them to use these tools anonymously and unlimitedly without creating any account.

AnonyChat **2024**
Flutter Mobile App & Admin Panel
I have developed a chat app with flutter that let people can chat anonymously across globe.

Zombie Rush Drive **2024**
Published Unity Game
🔗 [Google Play](#)
I took part in the development process of this game at Atlas Game Studios

Sky Wars Online: Istanbul **2024**
Published Unity Game
I took part in the development process of this game at Atlas Game Studios

Daysayar **2022**
Flutter Mobile App
🔗 <https://play.google.com/store/apps/details?id=com.sondermium.daysayar>
Some kind of challenge timer flutter app.

Bir Sayı Tut **2020**
Flutter App
🔗 https://play.google.com/store/apps/details?id=com.sondermium.think_of_a_number
Simple app that guesses numbers that you hold in your mind.

AngryBird Clone Game **2020**
Unity Game
🔗 <https://github.com/Sonderman/AngryBirdGameUnity>
I have developed this simple angrybird unity game in my free time.
